Colored pencil is becoming an increasingly popular medium due to its versatility, ease of use, and stunning results. On paper, colored pencil is a semi-transparent medium, and one must work from light to dark. But on suede matboard, something magical happens! Colored pencil becomes opaque, making it possible to apply light over dark. Come and experience this fun and unique way of working in colored pencil.

This workshop will provide step-by-step guidance on creating a beautiful cardinal on suede matboard.
